# HANDLING

**Airgest** currently carries out Airport Handling activities on its own and it is the only supplier of all services at Birgi Airport. The rates for ground handling services are calculated per Tons based on **Maximum Take Off Weight**.

The Airline companies that intend to operate flights at Trapani Airport will have to communicate in advance to Airgest its operational program. The services requested on an ordinary basis from carrier and the resulting rate applied, must be subject to the **SGHA**. Without an agreement, the standard rate will be applied depending on the aircraft type.

In relation to the duration of the SGHA and the passenger traffic expected from the movements planned by the carrier concerned, Airgest can provide discounted flat rates.

In any case, Airgest reserves the right to suspend or not apply discounted flat rate to Carriers with which a dispute has arisen or which have pending economic issues with the **HANDLER**.

Discounted flat rates:

- are intended to be applied for each rotation recorded.
- vary according to the type of aircraft and the traffic scheduled by the carrier.
- may be subject to rectification and integration during the annual final balance of the traffic registered per carrier.
- special needs (e.g.: a very short or particularly long turnaround; cabin special needs etc.) may lead to changes in the tariff agreed upon signing the SGHA.

<ul style="list-style-type: none"><li>• A penalty will be applied if the carrier/broker communicate the cancellation of the flight with less than 24h hours notice of the scheduled arrival time</li></ul>	<b>30%</b>  *(on the handling fare)
